Jenkins

1. Download Jenkins
2. Click on "local host" as

3. You will get the page as:

4. Copy the path and paste in windows browser for "Initial admin Password"
5. You will get the password as:

6. Click on "Continue"

7. You will see the following page:

8. Click on "Install Suggested Plugins" (it will automatically install suggested plugins")

9. You will get the following page where you can create new user name and password:

Create First Admin User

Username

Password

Confirm password

Full name

E-mail address

Jenkins 2.504.1   Skip and continue as admin   Save and Continue

10. Once you will provide the username and password , you will get the default host as:

Instance Configuration

Jenkins URL: http://localhost:8080/

The Jenkins URL is used to provide the root URL for absolute links to various Jenkins resources. That means this value is required for proper operation of many Jenkins features including email notifications, PR status updates, and the BUILD_URL environment variable provided to build steps.
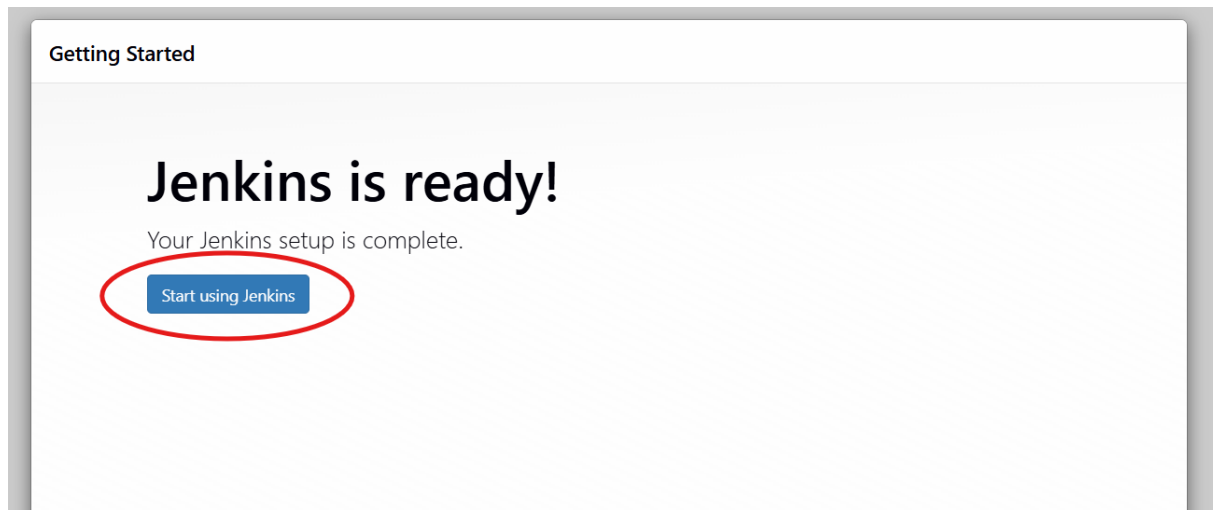

The proposed default value shown is **not saved yet** and is generated from the current request, if possible. The best practice is to set this value to the URL that users are expected to use. This will avoid confusion when sharing or viewing links.
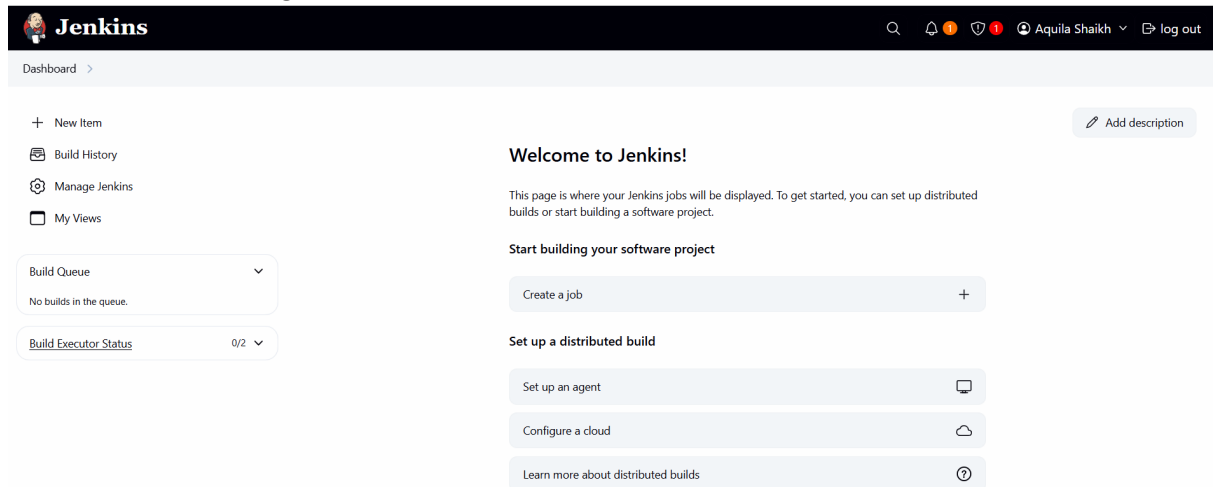

Jenkins 2.504.1   Not now   Save and Finish

11. Click on "Save and Finish", You will get the following page:

Getting Started

Jenkins is ready!

Your Jenkins setup is complete.

Start using Jenkins

12. Click on "Start using Jenkins", You will be able to see the Jenkins Dashboard as:

Jenkins

Dashboard >
